

## WATER TIMERS AND CONSERVATION

Time-saving and water saving tool for your lawn and garden. Water your lawn the right amount of water at the right time and place.

SMART DIGITAL WATER TIMER.....P06

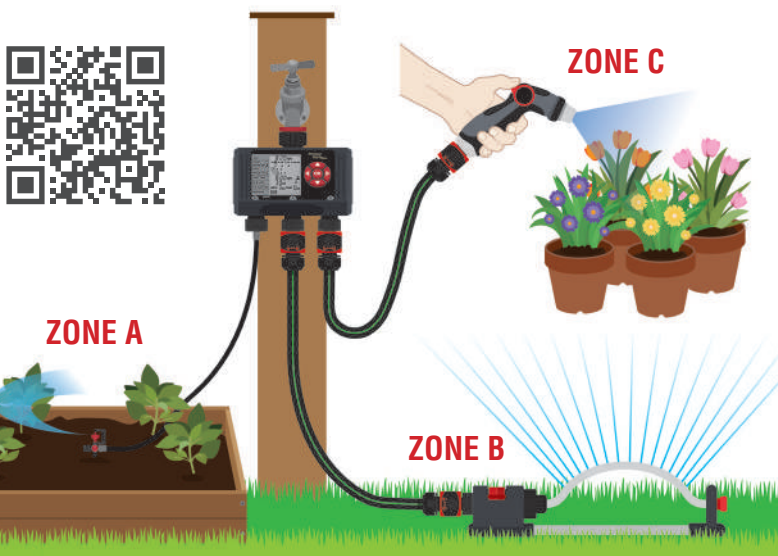

# ECO FUNCTION

Creates a pause in the watering cycle which provides an increase in water absorption time by the soil and prevents water run-off

## Programmable Electronic Water Timer

- Easy & intuitive control
- Up to 4 watering cycles per zone
- Water duration from 1 to 240 min.
- Flexible watering days
- Manual ON/OFF
- Rain delay up to 6 days
- ECO function for water conservation
- High-contrast LCD angled screen (larger characters for easy viewing)
- 2-Valve (25252E) and 3-valve (25253E) let you schedule watering independently for different areas of the yard
- Compatible with Soil Moisture Sensor (SKU #25256, sold separately)

Requires 2 x AA Alkaline batteries (not included)

4 CYCLES PER DAY

ANY TIME OF THE DAY

ANY DAY OF THE WEEK

 **Bluetooth®** manage your watering from the comfort of your lounge

**Bluetooth® Water Timer**

- Programming from smart device from as far as 10m (33ft)

# MOISTURE SENSING

## WATER CONSERVATION

Maximize your water conservation by preventing water waste

**CONNECT THE CABLE TO TIMER**

### Attention:

This unit requires an AQUASTAR® electronic water timer (*not included*). Please Follow the timer instructions to program the timer. This unit can help prevent overwatering. This unit will only work with the first valve on multi valve AQUASTAR® timers. Sensor must be connected to the 3-pin socket located at bottom of the timer.

25256

### Soil Moisture Sensor

- Prevents over watering of soil
- 5 Levels of moisture sensitivity
- Set desired moisture levels with control knob
- Built-in **5m** cable

25417

### Soil Moisture Sensor Wireless Technology

- Monitors soil moisture to protect from overwatering
- Uses wireless technology up to **330ft (100m)**
- Controls one valve at a time
- Additional moisture sensors can be added for multi-valve water timers

Requires 2 x AA Alkaline batteries (*not included*)

# DECISION MAKER

Select the time you want and let it take care of your watering needs

25260-55E

## 1-Zone Classic Electronic Timer

- Pre-set 11 frequencies (4,6,8,12 hrs ; 1-7 days)
- Duration from 1 min. to 240 min.
- Battery status indicator
- Manual ON/OFF
- Compatible with Soil Moisture Sensor (SKU #25256, sold separately)

Requires 2 x AA Alkaline batteries (not included) 

25321E

## 1-Zone Electronic Timer

- Ergonomic rotary control dial for easy select
- 4 preset frequency cycles
- 7 Day frequency
- Switch to manual operation at any time
- Clear resin cover protection
- Digital clock keep updated on what time it is

Requires 2 x AA Alkaline batteries (not included) 

25300E

## 1-Zone Electronic Timer

- Dial select for frequency and duration
- Pre-set 11 frequencies from every 1 hr to 1 week
- Pre-set 10 durations from 1 min. to 120 min.
- Low battery indicator
- Rain delay by hour

Requires 2 x AA Alkaline batteries (not included) 

25322E

## 2-Zone Electronic Timer

- Dial select for of 13 program presets
- Pre-set 7 frequencies
- Small LCD time display

Requires 2 x AA Alkaline batteries (not included) 

# MECHANICAL TIMER

Easiest and quickest timers Ready to use  
No batteries required
